TPS RESPONSE RUBBER

Take control of the game!
From the blade to the
Ultra Tack grip,
the TPS Rubber
combines comfort,
flexibility, and power.
Every move becomes faster
and more precise to
meet your every need.

The iconic TPS stick is making a big comeback, now better than ever. True to the original style, TPS introduces a reissue featuring the latest material innovations, so you too can make history.

VCX3 PART - MID KICK FLEX POINT

Will allow for independent movement between the shaft and blade. This allows the handle to control vibration and create a unique feel enjoyed by most players.

PBF TECHNOLOGY SPEED COMPOSITE SHAFT

Designed with a patented speed composite resulting in a massive, sweet spot between the blade and the shaft generating an unbelievable sound on every shot.

TRU3 BLADE INSERT

An insert in the blade that dramatically reduces vibrations and helps to elongate the sweet spot (top performance near the connection point and at the end of the blade) and delivers a nice balance point throughout the blade for maximum puck control.

VTX PART - LOW KICK FLEX POINT

Allows for independent movement between the shaft and blade. This allows for a unique feel enjoyed by both agile and precision players. The big improvement is the shape of the shaft to represent the concave wave material for its unique flex control.

GO-EX1 COMPOSITE SHAFT

Experience exceptional performance, feel and sound with every shot, thanks to a durable high-performance, gapped-wall design.

XPND PERFORMANCE BLADE

A new, innovative design expands the sweet spot, enhancing performance and feel even further toward the tip of the blade.

W Z LANCTÔT

TPS is a division of Raymond Lanctôt Ltd, which is a Canadian-based, family-run business specializing in the distribution and production of premium sporting goods, apparel and eyewear since 1953.
