MACH

AMP FLEX FACING

Active Motion Performance Flex, is a flex zone added to the facing between the 2nd and 3rd eyelets to allow increased forward flex through the skating stride; enhancing Range of Motion for the skater.

POWERCOIL TONGUE

Features a new injected insert with faster recoil speed, to help the player flex and load the skate effectively.

UNIBODY POWERWRAP TECHNOLOGY, C.Y.B.

Stiffens the lower portion of the skate to optimize energy transfer from the LOAD to EXPLODE mechanics of skating. Coupled with the Choose Your Blade freedom, players can dial in the correct performance for their game.

HOW TO MEASURE

- For best results, take measurements over undergarments.
- Hold tape measure firmly, not tightly.
- Keep tape measure parallel to the floor.
- Match your measurements to the above size chart. If measurements fall between sizes: order smaller size for tighter fit or the larger size for a looser fit.
- If measurements for chest and waist correspond to two different suggested sizes, order the size indicated by the chest measurement.
- Each material should indicate what silhouette/fit is used (e.g. slim/modern, hockey fit, loose fit), so if it's a slim fit and you normally like a looser fit, you should order up a size.
