CODE TITAN

DESIGNED FOR THE PLAYMAKER.

CODE is engineered for the player with tough skin and an even tougher check. You'll know when you're on the ice with a CODE athlete – they'll be the ones involved in every play, making you rethink putting on skates that night. In addition to their playmaking ability, the CODE athlete will be the player with the drip – giving you a little swag while making it look easy. Just when you think you've figured them out, they'll show you something you've never seen before all while letting you know.

REKKER

DESIGNED FOR THE SNIPER.

Geared towards the game's filthy-handed sniper, REKKER is built for speed and precision. If you get a chance to capture a glimpse of REKKER as it flies past you on the ice, you'll notice that it's uniquely Sherwood. Carved from a different stone, yet embodying a design that was born from the ice — the circles, the hash marks, the dots, the repeating logo centre line, the crease...every detail on the stick was taken from its environment. The 2021 REKKER family will turn heads of fans and defensemen alike.

CODE III TITP TECH

BLACKLINE CARBON FIBRE XXV

An all new and improved carbon fiber weave that uses unique manufacturing methods to create our lightest and most responsive carbon fibre ever, allowing you to feel the puck like never before.

A precision measured handmade layup process creating the perfect balance point to maximize power, weight and feel.

VR 92''''''

Vibration reducing foam injected blade with the addition of new I-92 dampening inlay strategically placed in key impact zones for greater feel and durability.

R Shape shaft with Energized Velocity Taper - Redesigned from the ground up, the all new ergonomic shaft combined with new EVT gives players a pro shaft taper which allows for a greater power transfer in both shooting and passing

PYROFIL™ MATERIAL BY MITSUBISHI CHEMICAL

An all new revolutionary, lightweight carbon fiber created by Mitsubishi that greatly enhances durability while also creating our best feeling stick yet

CODE TMP PRO

The CODE TMP Pro is the answer for the next generation of elite players. It was designed with one goal in mind, to take the playmaker's game to the next level. Powered by Pyrofil Carbon Fiber by Mitsubishi, the TMP Pro is our best ever combination of power and precision. The new R Shape ergonomic shaft combined with our Energized Velocity Taper optimizes energy storage and release for unmatched velocity. The all new VR92 Blade features I-92 dampening inlay that strengthens the blade while also improving the feel for both pass reception and shooting. Featuring an improved Blackline 25K carbon fibre weave to enhance durability and Featherlite XT technology reducing unneeded weight in the blade and lower shaft to create the optimal balance point.

REKKER **ELEMENT** **TECH**

BLACKLINE CARBON FIBRE XXV

25,000 filaments in one square inch of carbon fiber - the higher carbon fiber content reduces the amount of resin required, thus reducing weight and ensuring you stay light as a feather.

FEATHER LITE X

Carbon layup created exceptional balance and feel. Even distribution of weight and power between the blade and shaft allows for optimal puck handling.

SW **CNT**

Reinforces and helps reduce weight to maximize durability in key impact areas. Extremely lightweight yet durable.

VRF TOE DRAG TECHNOLOGY

Curling carbon bridge in the blade created additional torsional rigidity at the blade tip for improved accuracy and response during shooting and passing.

LOW KICK SHAFT

A rework of the low kick shaft allows a quick load and release. Designed for the player who does all their damage down low in those hard areas close to the net. The low Kickpoint allows for increased flex resulting in a lightning quick release.

SPEAR SHAFT

Blade and shaft integration for precise flex and durability creates a consistent flex and torsional stability helps improve control and accuracy.

REKKER ELEMENT 1

Built for lightning quick shots that you don't see coming; the REKKER Element 1 is the ultimate stick for the sniper. The new VRF X blade reinforcement increases durability ensures your shots go exactly where you want it, when you want it. The Featherlite XT carbon layup creates incredible balance and feel, giving you optimal puck handling. The new R-Fire Kick Shaft is a low Kickpoint flex profile for a fast release that your opponents won't see coming. Top that off with our new Single Wall Carbon Nanotube technology that makes this stick extremely lightweight without sacrificing durability. You'll be a head turner on the ice and on the scoreboard.

PLAYRITE

SHERWOOD
PLAYRITE

With four different sizing options, the stick lengths and flex levels fit youth players as they grow, enabling them to improve their shots and help them to enjoy the game.

IMPROVE YOUR SKILLS

Give your child the ability to learn how to properly load the stick and improve their shot and stick-handling skills at a young age.

ENJOY THE GAME

Hockey is a fun game and could be even more fun for your child with the proper gear tailored for young players!

FLEX YOUR STICK

A stick that a youth player can flex!

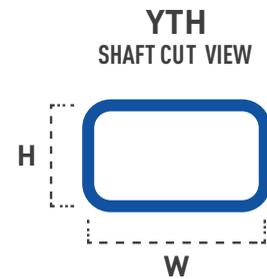

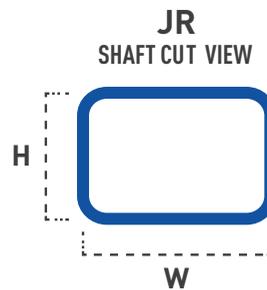

PLAY SAFE

Reduce the risk of injuries by using the proper stick length and flex.

SHAFT GEOMETRY

PLAYRITE 0 & 1 feature our youth geometry.
PLAYRITE 2 & 3 are built with a junior shaft size.

The shafts corners are more rounded than a senior stick to create better puck feel for small hands.

The all new Playrite series has been engineered for the young player to go and wheel, snipe, and celly. Both the height and weight of the player will be the determining factors for which Playrite stick is right for them. The Playrite series has been recreated with an all new shaft construction so the stick fits comfortably in a growing player's hands. The Playrite series is perfect for the growing player looking to develop their skills.

Features

- Playrite Construction - An all new construction that allows the shaft of the stick to comfortably fit into a young player's hands.
- Product Education for Parents - The Playrite series has been designed to match with a player's height and weight so parents can easily decide which stick is right for their young superstar.

BLACKLINE CARBON FIBRE XXV

25,000 filaments in one square inch of carbon fiber - the higher carbon fiber content reduces the amount of resin required, thus reducing weight and ensuring you stay light as a feather.

RE-GRIP

Textured grip application and spray grip coating. Improved shaft and paddle control.

OPC SLIDE SHAFT

Ultra slick coating in the upper portion of the shaft allows for easy movement from stance to puck playing position and back.

VRF.HD

HD foam insert helps reduce shot vibration in the paddle and blade.

BREAKOUT FLEX PADDLE

Mid Kickpoint paddle designed for goaltenders who like to play the puck - helping to generate increased velocity on passes.

REKKER ELEMENT 1

The Sherwood REKKER Element 1 is for the elite level goaltender and engineered with Blackline XXV carbon fibre for optimized weight reduction. Unique to Sherwood, a vibration reduction foam is infused in the blade and paddle for improved feel and rebound control. The Break-Out Flex Paddle, grip coating, and texture combine to offer goalies an improved puck feel, control, and stability while handling the puck and promote an increased puck passing velocity. Finally, the QPC Slide Shaft provides additional control and helps goalies quickly transition between movements.

***ENGINEERED TO
PROTECT.***

Viconic's technology has led the military and vehicle impact markets for over a decade.

Viconic Sporting utilizes patented energy absorbing technologies that outperform the competition. When space is at a premium, Viconic products excel.

- Maximum stroke efficiency provides enhanced impact protection
- Engineered specifically for each impact environment
- Ultra resilient material designed for repeat impacts
- Patented structure promotes airflow and movements without sacrificing protection

Viconic's focus is to engineer solutions that provide the most effective protection from impact-related injuries. The company's proprietary technology and engineered solutions are the future of sports safety.

GLOVES

COD TIME TECH

Ultra-resilient material designed for repeat impacts.

Customizable, adaptable fit and protection level, removable components.

Anti-microbial liner that is significantly proven to reduce bacteria and microbe causing odor.

Comfort in key areas, minimizing seams and friction causing discomfort.

Exceptional moisture management. High abrasion resistance for improved durability. Immediate "Game Ready" feel.

Pro preferred feel and look. Minimal break in period. Proven durability at all levels.

CODE TMP PRO

The elite playmaker is known for having soft hands. The new CODE TMP Pro glove ensures you end up on the highlight reel every time. With state of the art Viconic Impact Protection on the back of your hand you can be confident and aggressive every shift. Military grade 3D molded foams and the Viconic insert combine to take impact from any angle while still allowing for superior movement. With Customizable Impact Protection and Comfort Wrap features you can truly personalize your mitts. The COP-r29 anti-microbial liner has been engineered to help minimize bacteria build up so your gloves feel and smell fresh all season. The AX Suede Palm is game ready and combines amazing moisture management with exceptional abrasion resistance making them soft, durable and always ready to react.

PROTECTIVE

CODE TIMP TECH

VICONIC™ VIP

3D molded, ultra resilient material designed for repeat impacts. Its patented structure allows for superior airflow and movement without sacrificing protection.

CIP

Customizable and removable components that allow for a personalized fit and protection level.

COP-r29 *permanent anti-bacterial*

Anti-microbial liner that is scientifically proven to reduce bacteria and microbes which cause odor. Copper particles are within the fabric's yarns that remain effective over the lifetime of the pads to ensure that bacteria doesn't last.

COMFORT WRAP

Added comfort in key regions which minimizes friction that may cause discomfort.

CODE TMP1

SR | S - XL JR | S - L

The true playmakers want to be able to move without restriction and play with style. Enter the CODE TMP 1 tapered fit shoulder pads. Designed with elite players in mind, they have been engineered with Viconic Impact Protection in the sternum. This allows players to feel protected with 3D molded foams designed for rigorous and repeated impacts, while still being able to move with ultimate freedom. They also feature Customizable Impact Protection (CIP) in six key areas, allowing the player to customize the protection level and fit for them and their game. The CIP includes adjustable shoulder cap location, bicep height, removable extra bicep protection, adjustable rib guard location, adjustable rib strap length, and adjustable belly pad. The Comfort Wrap in the under arm region removes the risk of pinching and rubbing while the player moves. Featuring the all new E-Flow Foam, the foam has been created for extra ventilation and flexibility, so the player feels more cool and mobile than ever before. The COP-r29 anti-microbial and moisture wicking liner has been engineered to help reduce bacteria that builds up, helping your gear last longer and feel great for every game you dominate.

CODE TMP1

SR | S - XL JR | S - L

Offering a high level of customization and an elite level of protection and mobility, the three piece CODE TMP 1 elbow pads take center stage. The elbow pads feature Viconic Impact Protection. The ultra-resilient material is engineered for repeated impacts and located on the elbow joint and forearm. Whether you're walking the line with the puck or going around the outside on a defenseman, you're protected. The Customizable Impact Protection on the bicep has been engineered for the player to customize the fit and protection level of the elbow pads to fit their game. The Comfort Wrap mitigates pinching and friction as the player moves. The full COP-r29 anti-microbial liner is moisture wicking and greatly reduces the impact of harmful bacteria and microbes so your gear can keep that brand new feel. They also feature the all new E-Flow foam that enhances the player's mobility while still allowing them to feel cool on the ice.

REKKER ELEMENT TECH

VICONIC™ VIP

Viconic Impact Protection - Military grade VIP panels strategically placed on the back palm to deflect and disperse impact. Ultimate protection against key impact areas.

C.I.P. CUSTOMIZABLE IMPACT PROTECTION

Customizable and removable components that allow for a personalized fit and protection level.

COP-r29 permanent anti-bacterial

Anti-microbial liner that is scientifically proven to reduce bacteria and microbes which cause odor. Copper particles are embedded within the fabric's yarns that remain effective over the lifetime of the pads to ensure that bacteria doesn't last.

REKKER ELEMENT ONE

SR | S - XL JR | S - L

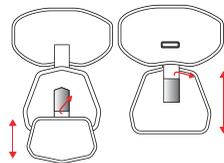

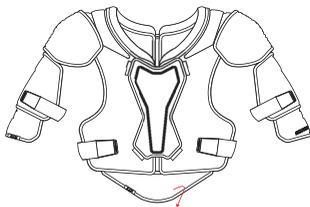

Sherwood REKKER Element 1 Shoulder Pads featuring Viconic Impact Protection panels placed strategically in the arch and rib areas deflect and disperse impact for the ultimate protection. 3D molded floating spine plate and Aerofoam panels promote maximum mobility. Lightweight and adjustable chest and abdomen Aerofoam protection provides a perfect fit every time.
