## SELECTING THE RIGHT STICK.

The flex of a stick is measured by the amount of weight needed to flex it, which will directly impact the performance a player can achieve with the stick. Selecting the right flex allows players to optimally direct their energy into the shaft, resulting in more accurate, harder, faster shots, better stickhandling, and improved passing.

OPTIMIZED SHOT

ACCURACY AND CONTROL.**

The above chart is a guide that will help position each player with the right stick. However, there may be instances where the suggestions are not applicable to an individual player for a number of reasons. We strongly encourage all consumers to consult their local authorized TRUE retail staff who can help validate final stick choice for each individual player's needs.
